UK, London, E10 5EF,

Profile Summary

Motivated junior software engineer with a background in full-stack development and hands-on experience building responsive, data-driven web applications. Strong foundation in React, TypeScript, Node.js, and SQL, with a growing interest in Python and Next.js. Currently working at Third Bridge as a Workplace Coordinator and seeking to transition into an engineering role, bringing a mix of technical skill, teamwork, and a deep understanding of product delivery within an Agile environment.

Technical Skills

Frontend: React, TypeScript, Chakra UI, React Query, Zustand, Context API, HTML, CSS

Backend: Node.js, Express, Prisma

Database: PostgreSQL, MySQL (learning)

Other: Python (basic), Next.js (learning), Git, Trello, Agile methodology, REST APIs

Projects

Game Hub (view live)

Personal Project

- Built a responsive game discovery web app where users can browse, search, filter, and sort games using the RAWG.io API.
- Developed with React and TypeScript, leveraging Chakra UI for UI components and React Query for data fetching and caching.
- Managed global state using Zustand and Context API for scalable data flow.
- Focused on performance optimization and user experience through clean, modular code and reusable components.

Team Project - Boolean UK (view GitHub)

Collaborative Agile Project

- Contributed to a real-world, team-based social media app project following Agile methodology with weekly sprints and Trello for task management.
- Implemented frontend components and integrated backend APIs using React and Node.js.
- Gained experience with version control, peer code reviews, and iterative feature delivery.

Work Experience

Workplace Coordinator - Third Bridge

*Jan 2025 - Present**London, UK*

- Coordinating workplace operations and collaborating with cross-functional teams, gaining exposure to internal technology systems and workflows.
- Supporting office tools and automation tasks, which sparked interest in applying technical solutions to internal challenges.
- Developed strong communication, problem-solving, and collaboration skills within a fast-paced environment.

Education & Certificate

Full-Stack Software Development Programme - Boolean UK

*Sep 2023 - Mar 2024**London, UK*

- Earned Full-Stack Development Certificate ([view certificate](#))
- Covered HTML, CSS, JavaScript, React, Node.js, Express, PostgreSQL, Prisma, and Agile methodologies.
- Completed multiple projects simulating real client requirements, from frontend UI design to backend API integration.
